PROFESSIONAL SUMMARY

Software Engineer with **1+ year of hands-on experience** designing, developing, and maintaining scalable systems using **Node.js, Express.js, Spring Boot, and MySQL**. Experienced in building production-ready REST APIs, authentication systems, payment integrations, automated cron workflows, and real-time services. Strong understanding of backend architecture, database optimization, and API performance tuning. Proven ability to build and maintain backend systems powering live mobile and web applications.

TECHNICAL SKILLS

Backend Development: Javascript, Node.js, Express.js, Java, Spring Boot, Spring Framework

Frontend: Html, Css, Javascript, React.js

API Development: REST APIs, Authentication & Authorization (JWT), API Optimization

Databases: MySQL, Stored Procedures, Query Optimization

Realtime & Integrations: Socket.io, Firebase Cloud Messaging, Razorpay Integration

File & Media Handling: Multer (File Upload Management)

Automation & Tools: Cron Jobs, Nodemailer, Postman

Version Control: Git, GitHub

Development Tools: VS Code, IntelliJ IDEA, Eclipse

Deployment : Ci Cd pipeline, Github Actions

Core Strengths: API Design • Payment Integration • Backend Automation • Database Optimization • Authentication Systems

WORK EXPERIENCE

Software Engineer — Wertone IT Services

Nagpur, Maharashtra, India | Aug 2024 – Present

- Designed, Developed and maintained backend services for multiple live production applications:- playstore:- [DailySabji](#), [ServiceDiary](#), [QwikBill](#), [F2G](#), [Gymnix](#) web links:- [Gymnix](#), [dailysabji.com](#), [f2gfinance.com](#), [nexstayhospitality](#)
- Built **invoice generation** and integrated **Multer** for handling file uploads (Excel, JPG, PNG, JPEG, GIF).
- Designed and optimized **various search APIs** for improved data retrieval.
- Created **cron jobs in Node.js** for scheduled notifications and automated tasks.
- Configured **Nodemailer** for email services and implemented **JWT authentication** for secure user verification.
- Integrated **Firebase** for push notifications, Designed and optimized MySQL queries and **MySQL stored procedures** for optimized database operations.
- Implemented automated daily backup, payment refund with cron jobs
- Integrated **razorpay payment gateway**, including payment handling, **webhook** processing, and refund workflows.
- Implemented real-time updates using **Socket.io** for instant transaction and data reflections.
- Implemented **Redis** based OTP verification with temporary data storage, TTL expiry, and secure validation.
- Designed and implemented **role-based authentication and authorization** to enforce secure access control across application modules and APIs.
- Built and managed all essential backend functionalities, ensuring smooth system performance and scalability.

PROJECT HIGHLIGHTS

DailySabji– Food Delivery Platform (Backend Developer)

- Developed order management and backend APIs for live users.
- Implemented notification workflows and payment integration.
- Built automation jobs for operational maintenance.

QwikBill– Billing Management System

- Designed backend logic for invoice generation and transaction handling.
- Implemented secure authentication and database optimization.

ServiceDiary– Service Management Platform

- Developed search APIs and backend workflows for service provider management.
- Implemented scalable backend architecture supporting mobile applications.

F2G - Finance Platform

- Developed scalable REST APIs and backend logic for the F2G Finance platform to support financial operations and user management.
- Optimized database queries and backend services to improve performance, reliability, and system efficiency.
- Enhanced application security and stability through authentication, secure data handling, debugging, and production support.

EDUCATIONAL QUALIFICATION

Completed B.E from K.D.K college of Engineering

Branch: Electrical Engineering under RTMNU. In 2023 CGPA: 6.86

CERTIFICATIONS

Certification Course in Java Full Stack with Angular, Anudip Foundation Duration: 5 months (Completed in 2024)

CIN no. : U74900HR2009PTC039529

ACHIEVEMENTS

- Built complete backend architectures for multiple client and in-house applications.
- Awarded **2nd Prize** at Spark Project Competition.
- Ranked **1131** in TCS CodeVita Season 10.
